

Certificate IV Competitive Manufacturing

This new accredited qualification has been developed to assist in driving the change required within an organisation to increase its competitiveness in manufacturing processes and procedures.

The program is offered to individuals and groups within any facet of manufacturing. With ever increasing competitiveness at both a local and international level its critical that every opportunity is taken to review existing processes and refine them to optimise efficiency through increasing quality and safety and reducing costs.

This program is mostly based on Lean Manufacturing and incorporates TQM, Six Sigma and other best practice principles. Providing participants with the opportunity to contextualise these lessons to their own individual circumstance and achieve real and sustained workplace improvements.

Our Facilitators

Humanagers' facilitators have many years experience in a broad range of manufacturing environments and are industry leaders in the principles of Lean and Competitive Manufacturing

About this Program

This practical based accredited program is aimed at operators, technicians, trades people and supervisors with at least 3 years industry experience.

The series of half day workshops can be delivered over a period from 10 to 24 months.

This program has been developed specifically for the manufacturing sector and incorporates aspects of change management as well as leadership.

Participants will be required to implement a range of lean manufacturing tools in their workplaces and undertake a range of activities including the implementation of 5S and a quick changeover improvement projects. Participants will actively engage with others during the workshops and drive the application of process improvements back in their workplaces.

Program topics include:

- Continuous improvement
- 5S
- Quick Changeover
- The 7 wastes
- Lean operations
- Industry site visits
- Sustaining improvements
- Problem solving tools
- Mistake proofing a process
- Root cause analysis
- Proactive maintenance
- Leading change in the workplace

Awarding of a Certificate IV in Competitive Manufacturing will require active participation in all 10 sessions and the completion of the workplace activities.

Certificate IV Competitive Manufacturing
